Department of Molecular Biology and Genetics, Aarhus ...

Diagnostic molecular biology is widely used in a number of areas including haematology, immunology and microbiology with possibly the least developed area being clinical biochemistry. Apart from diseases such as cystic fibrosis and genetic haemochromatosis, most genetic diseases tested for in clinical biochemistry laboratories are rare in the general population.

Molecular biology - Wikipedia

The main tasks of the Department of Molecular Biology and Genetics are to provide research-based teaching at the undergraduate, graduate and doctoral level, to do research at an international level, to transfer knowledge to companies, and to disseminate the results of our research to the general public within molecular biology and genetics.
