Regents Earth Science Resources: Earth's Motions

Sun's Path Lab Activity This computer-based lab has students test their understanding of the sun's apparent movement (within an observer's celestial sphere) using a University of Nebraska interactive animation. Daily and seasonal changes are covered in this activity. Previous 10 Files

Notes, Handouts, Answer Keys - Mrs. Brighton's Webpage

With this interactive lab, you can examine the main factors that affect temperature, length of day and seasonal altitude of the sun. Hopefully you will discover how the position of the Earth in it's orbit coupled with the tilt of the Earth's axis of rotation is responsible for seasons and the position of the path of our Sun in the sky over ...

Earth Science Lab Sun Path

The four seasons in New York State are a result of Earth's 23.5 degree tilted axis, and the revolution of Earth around the Sun. As Earth orbits the Sun, the tilt causes the direct rays of the Sun to strike locations between the Tropic of Cancer (23.5 deg N) and the Tropic of Capricorn (23.5 deg S).
